Application Guidelines — Fiscal Year 2025

Virtual programming is eligible for funding, provided it complies with the rest of the guidelines.

Education Resource grants assist in the facilitation of partnerships between Delaware's schools, arts organizations and artists in providing standards-based arts learning experiences for pre-K-12 students statewide. Education Resource projects focus on ways that Delaware arts organizations can serve as resources to Delaware schools before, during, and after the school day through:

- student engagement in the arts during the school day (working with an arts specialist in the classroom for hands-on programs where students are actively participating in arts activities designed to deepen and broaden learning)
- extended-time arts programs in the schools before or after the school day (curriculum- and standard-based arts programs designed to give students additional opportunities to create, produce, and learn through the arts)
- integration of the arts with other content areas and arts disciplines to provide collaborations between the arts and classroom teachers to reach mutual objectives
- development and implementation of standards-based curriculum and/or assessment models/tools
